

berkeinarchitects

Berkein Architects is a company with more than thirty years of experience in the architectural design. We are looking for young architects and structural engineers to start their professional development and career with us in our office in Sofia.

Role

You would be actively involved in the process of architectural design development in one of the following stages: preliminary research and concept design, technical design and detailing, quantity calculations. In the long run opportunities to cover more than one stage of the process could open up.

Responsibilities

- Develop architectural or structural projects in a BIM environment (Revit)
- Prepare conceptual documentation for presentations or technical documentation for building permits and construction
- Coordinate project development with involved team members from the other stages
- Perform administrative responsibilities including taking notes during meetings, preparing correspondence, and managing files

Qualifications and Skill Requirements

- Relevant University degree, or equivalent combination of education and experience
- Ability to adapt to a changing environment and handle multiple priorities
- Excellent analytical skills, and writing and verbal communication in English

Organizational Values & Culture

At Berkein Architects, we use our expertise to deliver high-end quality projects to our clients. When you visit our offices in Aalter, Belgium or Sofia, Bulgaria, you will find our driven, efficient, creative, and analytical team developing the ideas and dreams of our clients.

Our team members are passionate about growth, innovation and collaboration. We are constantly striving to improve and better ourselves so that we can better support our clients. If you have growth mindset and you thrive under pressure, you are probably a great fit for our team!

If you are still a student, we would also be interested to discuss possible collaboration for internship or part-time occupation.
